OUR BRANDS

A Division of R/W Connection

COORDINATED AUTONOMY

Core to our strategy is our relentless focus on local **autonomy**. We look to partner with well-managed, profitable businesses where significant operating changes are not necessary and encourage current management to continue doing what they do best – service customers profitably. After becoming part of the group, we **coordinate** efforts to ensure your business has access to our full breadth of products and services to offer your customers and integrate back office functions together through best pricing & rebates, training programs, shared best practices, marketing, legal, accounting, IT, and HR services. Our goal is to work with your local management team to create opportunities for key employees, incrementally grow the business and improve profitability.
